Graduate Research Assistant, [ROC-HCI lab](#), Supervised by Prof. [Ehsan Hoque](#)

*Aug 2021 - Present*

- **SAPIEN: *An Affective Virtual Agent Platform*** Building and validating an LLM-driven anthropomorphic 3D avatar platform that can be used in a multitude of ways for skill development and education. Such as academic tutoring ([demo](#)), language learning, training doctors on end-of-life communication, training therapists for PTSD patients, social interaction practice, job interviews, and others.
- **Hi5: *Synthetic Dataset for Hand Pose Estimation*** Using Unity 3D game engine we created a high-fidelity, realistic, diverse, and large synthetic dataset for human hand pose estimation.
- **AutoGait: *Ataxia Risk Assessment using Computer Vision*** Using object detection, pose estimation, and classification to predict the risk of ataxia from a video of a person walking. The classifier correlates with clinical knowledge without being explicitly programmed.

### SAPIEN Coach, LLC

NY

Cofounder

*Mar 2023 - Present*

- Co-founded [SAPIEN.Coach](#): an interactive, multilingual, emotionally responsive, virtual-human-based coaching platform for learning academic or soft skills, guided by our research.
